Introducing Multi-Region replication

You can now host a replica of your user pool in a second AWS Region. Multi-Region replication includes DNS failover and automatic sync of your user directory between instances.

POST /StudentFeedbackAPI (5fhgv7f)

Lambda function

StudentFeedbackAPI (us-east-2) [↗](#)

[Detach integration](#)

[Manage integration](#)

Integration ID

ir8l5zf

Description

-

Payload format version

The parsing algorithm for the payload sent to and returned from your Lambda function. [Learn more](#)

2.0 (interpreted response format)

Invoke permissions

The resource policy of the Lambda function determines if API Gateway can invoke it. You can run the AWS CLI command snippet below to give API Gateway permission to invoke your AWS Lambda function.

► Example policy statement

Timeout

The number of milliseconds that API Gateway should wait for a response from the integration before timing out.

30000
